

## NEW SOFTWARE FOR THE KIRK ISDN INTERFACE CARD

---

### Service News 106

New software for the KIRK ISDN Interface Card, Version number: 1410 2598-QSIG- 14E together with the WMS flash 1330 0180 PCS 02 or newer.

### Facilities implemented

This software is only for changing the ISDN Interface Card containing software 1410 2500 Qsig ver. 13N or newer, to only handle Samsung Office Server 500 PBX.

The software can be downloaded here <http://www.kirktelecom.com/Installers/suk200.asp>

See the Installations Guide on our website for more details here: <http://www.kirktelecom.com/company/suk169.asp>

### Note

Because of the new combination software for the ISDN PRA card we need to upgrade all cards with software older than 1410 2500 version 13N. This upgrade can only be done by KIRK telecom. To handle this you can make an agreement with Christina Elvang or Mette Philips for an upgrade or swap of your card. Subsequent upgrades can be done by yourself.
